@decrement

I create efficient programs with C++ and search non-standard solutions to any tasks. While studying in "Applied mathematics and computer science", I received a good mathematical education, which helps to me in my work. I apply on practice knowledge of compilers and neural networks for developing elegant and beautiful optimized code. Trying to find myself in site development has rewarded me with an understanding of the main business processes and the importance of getting the job done on time. I am sure that my focus on results and desire to create can help me and my team achieve success in tasks of any complexity.

CSoft

EXPERIENCE

2020 Web Development

I developed any websites, including online stores and vcard sites.

Python / HTML/CSS / Django

2020 **C++ Developer**

Development of NanoCAD modules.

C++ / ObjectARX

2020 - 2022 NPU Compiler and Runtime developer Samsung Research

Working on Samsung ONE neural framework and compiler for NPU.

C++ / Python / Neural Networks / NPU

2022 - Present Engine developer Saber Interactive

Development of internal 3D-engine for modern AAA-projects.

C++ / Game Dev / Data structures

EDUCATION

2017 – 2021 Bachelor's Degree Moscow Aviation Institute

Applied Mathematics and Computer Science

2019 Course Mail.ru Group

Machine Learning in MAI

2020 Course Mail.Ru Group, MIPT

Python for Data analysis

2021 Course École Polytechnique Fédérale de Lausanne

Digital Signal Processing: Basic Concepts and Algorithms

LANGUAGES HOBBIES READY TO WORK

Russian - native I'm interested in Olympiad programming, I am ready to full time work, ready for remote work and relocation.
